

Embossed Waterfront Moonlit Night

Stamp Set: Waterfront, Teeny Tiny Wishes (greeting)

Ink: Versamark

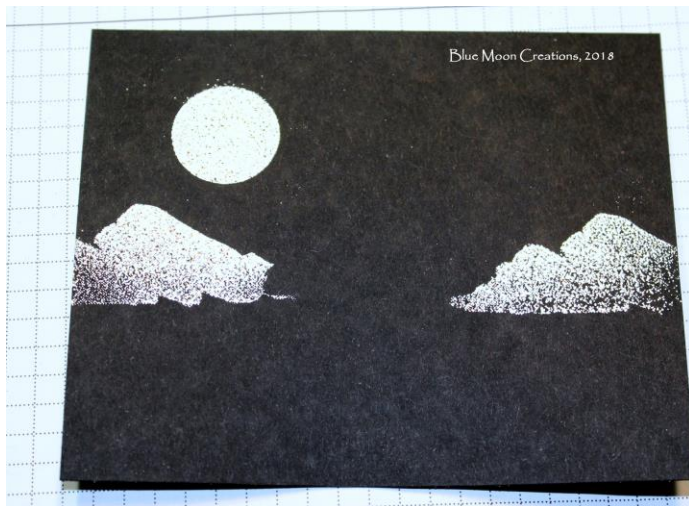

Paper: Basic Black, glimmer paper

Accessories: Embossing Buddy, heat tool, silver embossing powder, Mini Dimensionals, 3/4" circle punch, post-it-note, copy paper

1. Create a mask for the moon by punching out a circle from a post-it-note using a 3/4" circle punch. You'll be using the negative space as your mask. Create a mask for the trees by stamping the image onto a post-it-note, then cutting out the image using a pair of scissors.

2. Swipe Embossing Buddy over the card front. Place the post-it-note with the circle punched out of it onto Basic Black card front. Place the tree image mask onto the card front. With a sponge, apply Versamark through the punched hole, then remove the mask. Stamp the mountains from Waterfront over the masked trees using Versamark.

3. Remove the tree mask and heat emboss circle and mountains using a heat tool and silver embossing powder.

4. Stamp the tree image in the empty space between the mountains using Versamark. Heat emboss using a heat tool and silver embossing powder.

5. Stamp the land image repeatedly on the bottom of the card front using Versamark. Heat emboss using a heat tool and silver embossing powder.

6. Place a piece of copy paper on the bottom half of the card front to create a mask. Create grass by stamping the top parts of the "palm tree" image from the stamp set around the base of the trees and along the ground on the bottom of the card front using Versamark ink. Heat emboss using a heat tool and silver embossing powder. Repeat to add more grass as needed.

7. Attach card front to glimmer paper mat using Mini Dimensionals to pop it up. Attach to Basic Black card base.

8. Swipe Embossing Buddy along the lower edge of the card base. Stamp greeting using Versamark and heat emboss using a heat tool and silver embossing powder to complete.
